

It is very important to the residents of Wisconsin that the Wisconsin Do Not Call List is not banned or changed. As residents of Wisconsin, we wanted the Do Not Call List and have embraced it since it was put into affect. We have the right to privacy in our homes. All unwanted telephone solicitations are an invasion of that privacy.

Personally, I have found Wisconsin's ban to be extremely affective and have enjoyed being able to spend total quality time with my family instead of having constant interruptions from unwanted phone calls. Quality time is hard enough to find. One should be allowed to have complete control how they spend their time when they are in their own homes. Unwanted phone calls does not allow for that control.
